## EDUCATION

### Bachelor of Science in Computer Science

California Polytechnic State University, San Luis Obispo

May 2029

San Luis Obispo, CA

- Coursework: Data Structures, Algorithms and Complexity, Object Oriented Programming and Design, Systems Programming, Discrete Structures, Intro to Computer Organization

GPA: 3.514

## PROJECTS

### NoteSharer | TypeScript, Next.js (React), CSS3, HTML5

Nov. 2025 – May 2026

- Developed reusable React components and collaborated on feature implementation using Git, pull requests, and code reviews within a 7-person Agile team over the course of 7 months to create a campus-specific marketplace for exchanging study resources, using Next.js, TypeScript, Supabase, and CSS.
- Participated in agile development processes, including feature planning, code reviews, testing, and team collaboration to deliver a scalable web application.

### Musng – Social Media | React, Node.js, Express.js, PostgreSQL, Prisma

August 2026

- Built and deployed a full-stack social media platform enabling users to publish short posts, follow accounts, echo posts, reply to conversations, and customize profiles.
- Designed a RESTful Express.js API with Passport.js session authentication and authorization controls, supporting both authenticated interactions and read-only guest browsing.

### Where's Waldo | React, Node.js, Express.js, PostgreSQL, Prisma, JWT

August 2026

- Built and deployed a full-stack Where's Waldo game with multiple interactive boards and persistent PostgreSQL leaderboards.
- Designed a RESTful API with server-side coordinate validation and JWT-based timing, preventing clients from directly manipulating completion times and leaderboard scores.
- Deployed React/Vite and Node.js/Express.js services with PostgreSQL on Railway, configuring CORS, environment variables, and Prisma migrations.

### Transmit - Messaging App | React, Node.js, Express.js, PostgreSQL, Prisma

August 2026

- Developed and deployed a full-stack direct-messaging application where users can create accounts, browse a user directory, manage profiles, and exchange persistent one-to-one messages.
- Organized backend routing, controllers, authentication, and database access into separated layers to improve maintainability and support feature growth.

## WORK EXPERIENCE

### Lifeguard

City of Los Angeles, Recreation and Parks

April 12, 2023 – Present

Los Angeles, California

- Instructed 100+ swim lessons and coached the novice swim team along with supporting other lifeguards instructing dive team and synchronized swimming.
- Developed effective communication skills by providing clear and concise instructions to swimmers during swim lessons and enforcement of pool rules.
- Showcased professionalism and collaboration by working with other lifeguards and staff members to create an efficient and safe pool environment.

## TECHNICAL SKILLS

**Languages** | JavaScript (ES6+), TypeScript, Python, C, SQL, HTML5, CSS3

**Frameworks** | Next.js, Express.js, Prisma, Passport.js, bcrypt

**Developer Tools** | Git, GitHub, Node.js, npm, Railway, VS Code

**Databases**: PostgreSQL, Supabase
